

**Innovation. Knowledge.  
Implementation.**

**Your partner for asset management  
and maintenance.**

[www.mcp-dankl.com](http://www.mcp-dankl.com)

**dankl+partner consulting gmbh**  
**MCP Deutschland GmbH**

**» Your success is our goal! «**

**We are your partner for excellence  
in asset management, maintenance  
and engineering.**

# Are you using your full potential?

We are your partner for excellent and sustainable asset management. **Using innovation, knowledge and a strong drive for implementation.**

Our System for Excellence – S4E applies right where you see your biggest improvement potential. No matter if the organization has to be restructured completely new or just fine-tuning in certain sections like repair parts management, maintenance software or efficient knowledge management due to staff fluctuation has to be applied – we will assist you with hands-on experience and international benchmarks.

**Let's walk a part of the way together. Become a top performer!**

Yours sincerely,

Dipl.-Ing. Dr. Andreas Dankl

Managing director of dankl+partner consulting gmbh and MCP Deutschland GmbH

**dankl+partner consulting and MCP Germany are part of the MCP International Network. In cooperation with our partners in Great Britain, Portugal and USA we are supervising client projects all over the world.**

# System for Excellence – S4E

## Improvement step by step.

The first step is the most important. Make use of the System for Excellence – S4E for your orientation!  
Divided into **6 areas** and more than **80 knowledge modules** it systematically shows you current strengths and opportunities for improvement.

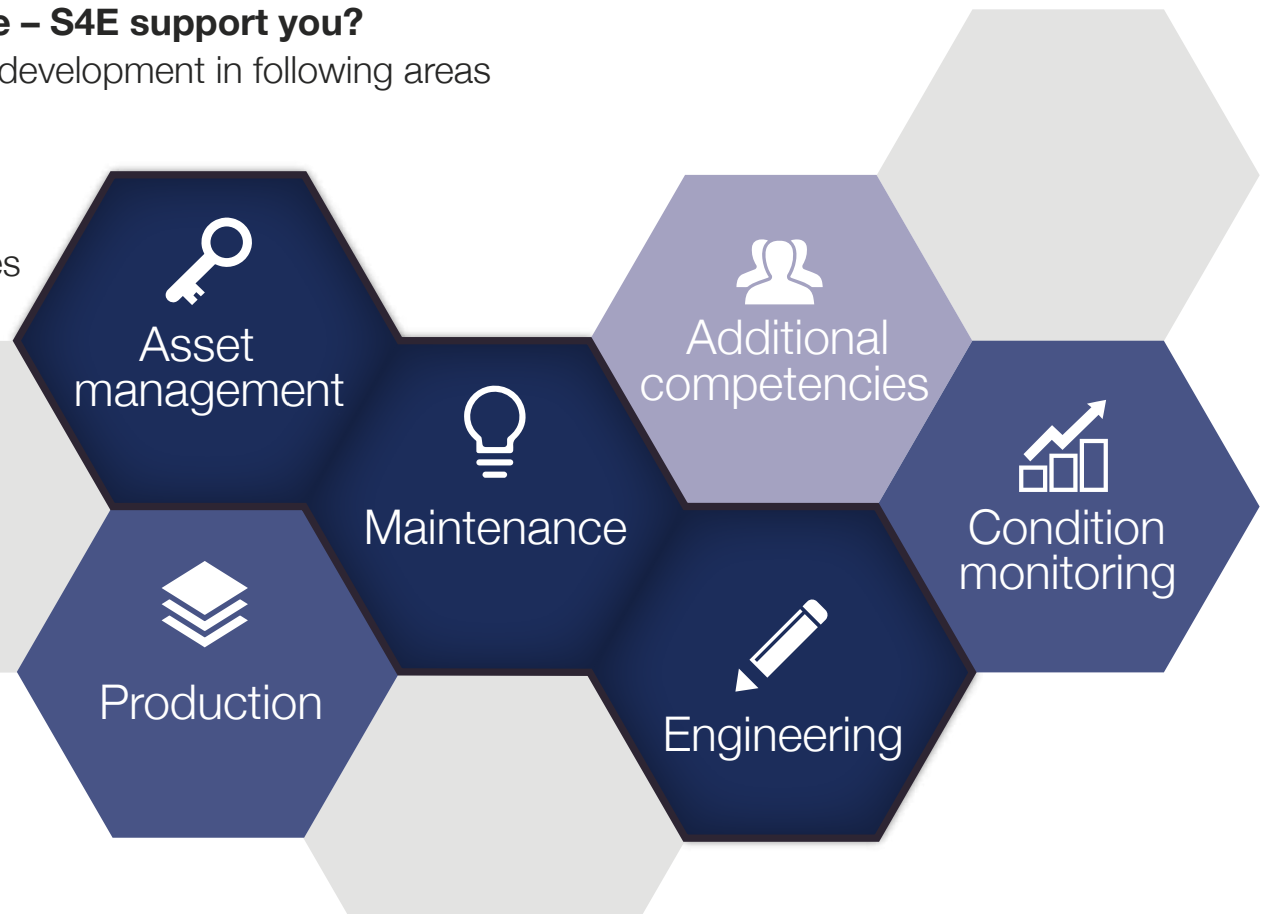

**With accountable benefits for your organization!**

### In which tasks does the System for Excellence – S4E support you?

In the assessment (of the situation) and the further development in following areas

- Asset management
- Maintenance
- Engineering
- Production
- Condition monitoring
- Additional competencies

**HINT:** Obtain a significant overview over your organization or edit selected individual sections (e.g.: risk analysis, level of planning, mobile devices)

## Maintainers are the top athletes of engineering.

Our goal is to increase your performance in striving to a consistent development up to 'World Class'.

**Learn from the best.** We are using the worldwide unique database AMIS. Using datasets of more than 4,300 enterprises of all industries and enterprise sizes we are able to develop tangible assertions regarding best practice approaches for your industry as well as valid percentiles of all industries.

AMIS

# Our Performance. Your surplus value.

We place strong importance on accompanying our clients sustainably from analysis to implementation. Every situation requires an individual solution. Therefore, our consultants provide long-term industrial work experience and sensitivity for the requirements of your employees on site.

Every step is important – We professionally administer to your detailed questions (e.g. suitable mobile applications, hints & tricks regarding your repair part management, which assets/asset parts are my assets/asset parts of risk, how can I prevent knowledge loss e.g. due to employee loss, etc.)

- Audits and strengths and weaknesses analysis
- International comparison of KPI's using AMIS database
- Strategy and organization concepts
- Process analysis and process modelling using IT
- Programs to increase efficiency and to cut costs
- Risk analysis for assets (FMECA, RCM), development of asset strategies
- Outsourcing analysis and auditing outsourcing projects
- Advertising services regarding facility management und maintenance
- Designing maintenance and service contracts
- Selecting EDP systems and implementation support
- TPM analysis, TPM implementation and TPM coaching
- Provision of positions for leaders, engineers and specialists
- Part time management for implementation support and implementation controlling

**Used methods and tools: Working on your tasks we use international approved methods and tools: AMIS Benchmarking, FAMIS Benchmarking, FMECA, ORGSCAN, and FM-Scan, FITNESS CECK for maintenance, SPEED, RCM/RBM, System for Excellence – S4E, and much more.**

# Our principles and values.

**Our primary goal is the success of our clients.**

We support our clients at the successful development of their organization whether as a long-term partner or a short-term idea provider – depending on their preferences and needs.

**We accompany our clients on a long-term basis on their way to World Class.**

We support individually and with a practical attitude. We help establishing maintenance as a value-added partner.

**We don't offer run-of-the-mill solutions.**

We provide individual solution approaches for specific tasks to our clients. We support them using consulting services as well as trainings and seminars.

**Improvement is in our genes.**

Current (research) projects are focused in our MCC Maintenance Competence Center.

# Trainings & Seminars

Highly qualified employees are essential for maintenance. Hence the requirements for training offerings are diverse.

Therefore, we support you with **individual (inhouse) training modules, flexible webinars, and comprehensive seminars** up to an academic degree.

**Practitioners** coach practitioners. All of our coaches are proficient practical experts. They share their knowledge and experiences with the attendants of seminars and trainings.

## Our service:

- Implementation of diagnostic analyses for the requirements and skills of employees
- Creation of individual plans regarding qualification and training
- Development of functions descriptions
- Individual trainings for managers and operational personnel (inhouse/extern)
- Comprehensive seminars and qualification opportunities up to an academic degree

Within the Trainings Akademie for maintenance and production in cooperation with our partner Messfeld GmbH we offer trainings and seminars regarding management, engineering and additional competencies. dankl+partner consulting is an educational provider certified by ÖCert.

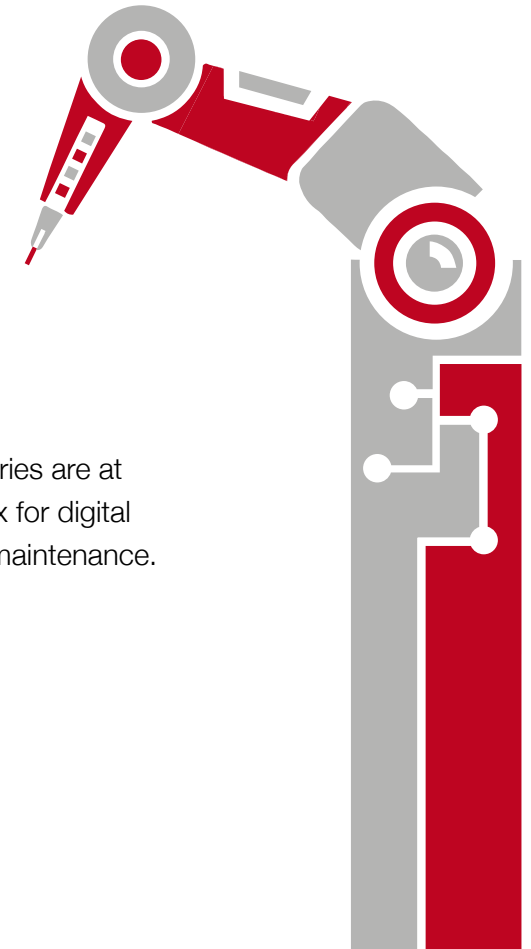

# Research & Development

**We accompany our clients on their way to future-oriented maintenance.**

Inside the MCC Maintenance Competence Center we combine the proficiency of sophisticated maintainers and experts in research and industrial internet.

Organizational and technological aspects like human resources and the changing requirements in times of interlinked factories are at the forefront of our thinking, as well. In cooperation with leading innovators regarding maintenance we work on the 'toolbox for digital transformation' as well as on an application database 4.0 with tangible best practice examples for digitalization regarding maintenance.

# Comments of our customers

“We were looking for a competent partner, who systematically determines the status of maintenance and reveals potentials. The cooperation was very pleasant and transparent for me as well as for the entire company.”

**Thomas Albert, BASF Site Benchmarking Ludwigshafen**

“I want to say thank you once more for the implementation of FITNESS CHECKS. These were really pleasant days and our cooperation was utterly helpful. I was really surprised about the great results but the revealed potentials are even more important. Now we are already in the process of implementing these improvements. Furthermore, even the management board was impressed by the results. This made the reputation of maintenance increase, as well.”

**Karl Kernbichler, Head of operating technology / Engineering Manager, Wewalka GmbH Nfg.KG**

„It was the first time for Altesse, that we critically and objectively took a look on our maintenance and its performance. For this we purposely called in external support with comprehensive experience. Finally, we decided to cooperate with dankl+partner – and that was a good decision. Using the FITNESS CHECK valuable improvement potentials were revealed quickly and its results are helping to establish maintenance as an important and valuable production factor in the long run.”

**DI Raimund Leitner, Plant Manager, Altesse Zigarettenhüllenerzeugung und Papierverarbeitung Ges.m.b.H.**

*Customer statement on our tool RCM-Speed:*

“Comprehensible and understandable tool, which quickly leads to more beneficial results.”

**Helmut Moitzi, Managing Director / Managing Director Technical, voestalpine Böhler Welding GmbH**
