

ACT INSTEAD OF REACT.

Take the right action now.

Increase the flexibility of your maintenance, but do it right.

In challenging times with increasing cost pressure, 'act instead of react' applies.

WHY?

The weakening economy and the corona virus are leading to reduced production and plant utilization - and that also requires adjustments in maintenance.

It is essential to **identify and implement the CORRECT adaptation measures**.

Because only effective measures increase the flexibility and profitability of your maintenance and enable an immediate improvement of the operating results.

Rely on a structured approach and the right measures.

WHAT?

In practice, there have been **15 approaches to adapting the maintenance and increasing in flexibility and profitability proven to be particularly effective:**

1. Adaptation of the goals for maintenance -services, -processes and -organization	2. Selective reduce from external services	3. Adaptation of the maintenance organizational structure	4. Prioritize maintenance measures correctly – Reduce immediate actions	5. Cost-cutting alternatives in the execution of M&I measures and repairs
6. Reduce expenses for investmenes and plant changes	7. Avoid downtimes in maintenance processes	8. Transfer selected maintenance tasks to the production	9. Identify and remove weak points	10. Save time handling documents
11. Savings in spare parts management	12. Optimize recurring plant revisions	13. Evaluation oft he plant substance as basis of cost avoidance	14. Reduce system failure risks systematically	15. Achieve savings through correct implemenatation of industrial safety ordinance

You can find details on the subject of 'increasing flexibility' here: www.dankl.com/flexibilitaet_steigern

HOW?

To apply the 15 tried-and-tested approaches to increase flexibility and economic efficiency in your company, **simply choose between 4 possibilities (modules)**:

1 WORKING DOCUMENTS:

Identify your most effective optimization approaches. We support you working documents (guidelines, checklists, practical tips) for the selection and implementation of the relevant approaches. Increase the flexibility and cost-effectiveness of your maintenance step by step on the basis of the working documents.

2 INHOUSE WORKSHOP:

In a one-day workshop, we will work with you to identify the most important approaches to adapting maintenance for your company. Systematically, those approaches are identified and evaluated, to enable the quick and at the same time effective result improvements for your operation. The resulting adaptation measures are included in an implementation plan summarized and terminated.

3 ONLINE SEMINARS:

The content and adaption measures of the 15 approaches are explained in detail by a maintenance expert in online seminars. The individual approaches are summarized in thematic blocks and carried out on four planned dates. You can find information about the online seminars, dates and registration conditions at www.dankl.com/online-seminar-flexibilitaet_steigern.

4 IMPLEMENTATION SUPPORT:

We would be happy to support you in the targeted implementation of your selected optimization approaches respectively to increase in flexibility and profitability of your maintenance. The implementation support is based on your requirements in terms of subject content and adaption measures. You will be looked after by our experienced practical experts.

You can combine any of the 4 building blocks with each other.

Each individual component helps to enable effective optimization of maintenance in your organization - to the extent that you need in your current situation.

Act instead of react.

Adapt your maintenance to changing market and production conditions. Realize, which approaches enable an immediately effective increase in flexibility and profitability and thus ensure an improvement in operating results.

We can help to recognize your strengths and areas of improvement, to increase the performance of your maintenance and to use for the company. Especially in difficult times.

Take the right action now. Give us a call or write a short email.
We will support you immediately – on site or digitally.
